

Guangzhou Top Power Electronics Technology Limited

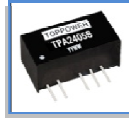

A leading manufacturer of PCB mountable converter modules

Product range

0.1W -40W DC/DC converters (Package : SMD /SIP/ DIP)

3W-30W AC/DC converters (Package : DIP)

Non-isolated DC/DC converters (Package : SIP)

Profile

Guangzhou Toppower Electronic Technology Co., Ltd., located in the High-Tech Development Zone (Guangzhou Science City), specialize in developing, manufacturing, marketing and service DC-DC, AC-DC power converters. We can provide our customers wide range of power conversions (0.1W~40W). Toppower is committed to providing top quality power converters and specialized service to our partner. There are more than 70 series converters, thousands of mature and stable products for choose. Common & popular converters are produced to be inventory models to ensure the fast delivery

Develop & manufacture

Our company is ISO 9001: 2008 certificated. Led by senior expert R & D team, our product is developed through project evaluation, program evaluation, sample test, small batch test, batch stereotyped ... After passing the design argumentation, engineering and manufacturing verification... various reliability tests, we can ensure the reliable power supply design quality. All the DC-DC, AC-DC power converters in Toppower own key components consisting of first class electronic components and high fire-retardant materials.

The automated equipment and technology make excellent product consistency and high passing rate. We have international advanced testing equipment and all products passed the initial test and final test twice 100% automated testing to ensure high reliability "TOPPOWER" Power supply Products.

Application

Our Service network covers the whole China mainland and overseas like Europe, America, Southeast Asia... to meet the different supply needs of both at home and abroad. Our power converters have been widely applied in the field of electric power, industrial control, instrumentation, medical electronics, communications & technology, rail transportation, security, military systems and so on.
